Art is the spirit of activity

“If life is the greatest form of art, then it seems only natural for artists to use the physical body as a medium. This is exactly what many performance artists did to express their distinctive views and make their voices heard in the newly liberated social, political, and sexual climate that emerged in the 1960s. It was a freeing time where artists felt empowered to make art ever more personal by dropping traditional mores of art making and opted to using themselves as living sculpture or canvas. This resulted in direct confrontation between artist and audience, producing a startlingly intimate new way to experience art.”

Of my own life using the body for art and my memories. I was in the elementary school the classes were mixed with young men and women there was a young man he was 10 years old . He was an optimist in his life. He loved others and was diligent in class. And his mother cared about him well and was afraid of everything and helped him in all his jobs. But one day his mother died because she was suffering from a serious illness After her death. Drop in the study. He also suffers from mental illness because his whole life revolves around the axis of his mother. He was sitting in the first seat in the row. One day the professor found him in the back seat and, bleeding from his hand, wrote his mother's name on his hands. It is painful, but not so deep as the pain that he carries with his heart and he wants to keep his mother beside him all the time. He used his hands to express his inner feelings. I think that everyone has a person in life who distinguishes him from others, whether his mother or someone else. Strange or close but this person like a mirror can not live without him. When talking to him, he feels like he owns the world. When he puts his head on the pillow, he thinks until he sleeps and. He finds it in his dream.

Body as canvas .Some limbs have used the human body as a site for making marks or applying paint and transforming the skin into an alternative to painting . It is

worth mentioning that in a common language (body art) refers to tattoo and body decoration . Around this time ,the body took on importance as a medium with which artist created their work .

The writers, activists and artists use the female body to ask a cause or change something in society. Women are inspiring to all the artists, the most beautiful being on earth, the inspiration that makes your inspiration stronger and more beautiful. Whatever way women are drawn, the misery of motherhood is beautiful all the time.

The beauty of a woman

like a horse is as authentic
as it is.

And the land is important so if this artist is talented and honest in his art and has what pleased them in their emotional life, and focuses their relationship to land and homeland and leadership.

There is a strong and strong relationship between the earth and man, especially the artist. There is an artist who has many works and uses nature to create his works. He is (Andy Goldsworthy) He used nature in a way that attracted everyone to his work. I have seen many photos about his works. His work presents ideas and lessons about life and about what is happening in the world. His actions carry puzzles, and when he watches the man, he thinks what he means by this document and behind . For example : I saw his picture, which is about us red and green leaves, I think red leaf to be blood and the green leaf as life . We can say that Golds worthy is making a satment about activism. There are many artists and their work is an activity, And make a change in society.

Activity or activists are not limited to professionals with high communication skills. The artist can be active and through their art. There is another relationship to art and activity is the relationship of art and land. The land is rich in many of the wonderful scenery. And how if the homeland is the second mother so the homeland is the basis to which every writer and artist and activity returned to him. The artists used the human body and the earth to renovate them because they play a key role in the formation of any

art that connects a goal and attracts the viewer. The earth inspires the artist with many colors and also the physical body and its use expresses the feelings of the artist from many cases. As for the writer, he is used to the homeland by writing his feelings of love towards the homeland or through the writer of the concept of land.

Of my own life. The artist I knew was a sports teacher this teacher spend many of his time in drawing. He was painting pictures of his homeland Palestine was drawing the flag of Palestine and picture for children and the pictures of mothers. He painted these pictures on wooden boards and presents it in an exhibition called the Palestinian Nakba exhibition the teacher expressed his feelings and love for his homeland through these drawings. And through the exhibition reminds us of our homeland, which we never forget. He uses images to express his vision or uses him to be an active person and expresses the issue of his homeland.

The corporeal body and earth are basics of the arts. For example : for nearly forty years ,Marina Abramović has been expending the boundaries of art . Using her own body as a vehicle ,she feelings of love towards the homeland or though the writer of the concept of land . So Andy Goldsworthy and Marina Abramović Summarize the importance of nature and the importance of the material body in art and also when I compare them I find that each of the best in his work and gave values to art and also exercise activity and express the views of society. I was amazed and impressed by their work.

last but not least art is a large and wide area can not summarize. So art is a phrase of a mass of emotions. Art works as an important tool in the formation of human awareness of the major issues that concern humanity or the homeland, or the good qualities that must be given or the bad to be discarded. Children's songs and stories , for example and drawings are the first educational method that consists of his ideas out honesty , loyalty and compassion and love.
